Dear Valued Customer,

**Re: Phyto Greens Capsules – Formulation Update**

Thank you for ordering GENESTRA BRANDS® Phyto Greens Capsules. We would like to inform you of a formulation update to this product. Phyto Greens Capsules is now Organic, non-GMO and suitable for a much wider audience.

Formula Highlights:

- **85% Organic and non-GMO.** Formulated with organic greens, organic spirulina, organic chlorella and organic fruit & vegetable blend. Ingredients that could not be confirmed non-GMO have been removed (such as bee pollen and soy lecithin). The capsule contents are the same organic ingredients used in our updated Phyto Greens Powder formulation which is certified USDA Organic.
- **Phyto Greens Capsules** uses non-GMO vegetarian capsules made from pullulan, which is naturally fermented from tapioca. Pullulan capsules have been carefully chosen for this formula due to their compatibility with the organic ingredients.
- **Added organic fruit blend and improved flavour.** Organic apple, cherry, strawberry, blueberry and blackberry have been added. These fruits, along with the addition of a wider range of organic vegetables and organic greens offer polyphenolic antioxidants (including anthocyanins and flavonoids).
- **Removal of soy lecithin.** Soy lecithin, a priority allergen has been removed from the updated formula.
- **Increase in spirulina.** Six capsules taken twice daily now provide 2,280 mg of organic spirulina per day to help reduce symptoms of allergic rhinitis such as nasal discharge, sneezing, nasal congestion and itching.
- **Removal of added beta-carotene.** As the updated formulation provides a substantial amount of naturally-occurring beta-carotene, added beta-carotene has been removed.
- **Removal of fructooligosaccharides (FOS).** Although FOS are a great functional fibre, they have been removed from the formula to reduce the risk of gas and/or bloating.
- **Updated Risk Information.** This updated formula is suitable for a wider audience.
